

# **BANKURA UNIVERSITY**

(West Bengal Act XIX of 2013- Bankura University Act, 2013)

Main Campus, Bankura Block-II, P.O.: Purandarpur, Dist.: Bankura, Pin- 722155, West Bengal

## **Office of the Secretary**

### **Faculty Council for Undergraduate Studies**

Ref. BKU/FCUG/179/2023

Date: 10/07/2023

### **NOTIFICATION**

As directed, the undersigned is pleased to inform all concerned that Bankura University has initiated the process to implement New Curriculum and Credit Framework for Undergraduate Programme, UGC 2022 (as per NEP 2020) for 4-years Undergraduate programme with BCA as Major, Minor etc. from the academic session 2023-2024. The Syllabus for the purpose will be framed and finalized as per the guidelines of appropriate authority. As an important corollary to the process, the workshop through online mode will be organized on the date mentioned herewith to get the feedback from the stakeholders. Present Students, Alumni, Guardians, Academicians and other stakeholders related to the specific programme/course are requested for their kind participation in the workshop and to present their views/ observations etc. The stakeholders may go through the draft syllabus attached herewith and convey their observations to the office of the undersigned on [ugsecretaryoffice@bankurauniv.ac.in](mailto:ugsecretaryoffice@bankurauniv.ac.in) within seven days from the date of publication of notice.

Date: 12<sup>th</sup> July, 2023.

Time: 11:30AM onwards

Google Meet joining info

Faculty Council for Undergraduate Studies

**BANKURA UNIVERSITY**

**Curriculum and Credit Framework for**  
**BCA Programme**  
(Semester-I and Semester-II)  
(Basic, Honours and Honours with Research)

designed in accordance with

Learning Outcomes-Based Curriculum Framework (LOCF)  
of National Education Policy (NEP)-2020

**DRAFT SYLLABUS**

**With Effect from the Session 2023-2024**

# **BANKURA UNIVERSITY**

## **Curriculum and Credit Framework for**

### **BCA Programme**

**(Basic, Honours and Honours with Research)**

#### **Preamble:**

Education is the key to development of any society. Role of higher education is crucial for securing right kind of employment and also to pursue further studies in best available world class institutes elsewhere within and outside India. Quality education in general and higher education in particular deserves high priority to enable the young and future generation of students to acquire skill, training and knowledge in order to enhance their thinking, creativity, comprehension and application abilities and prepare them to compete, succeed and excel globally. Sustained initiatives are required to reform the present higher education system for improving and upgrading the academic resources and learning environments by raising the quality of teaching and standards of achievements in learning outcomes in undergraduate program in professional streams of higher education like computer science. One of the significant reforms in the undergraduate education is to introduce the Learning Outcomes-based Curriculum Framework (LOCF) which makes it student-centric, interactive and outcome-oriented with well-defined aims, objectives and goals to achieve. LOCF also aims at ensuring uniform education standard and content delivery across the country which will help the students to ensure similar quality of education irrespective of the institute and location. With initiatives of University Grants Commission (UGC) for nation-wide adoption and implementation of the LOCF for bachelor's programmes in colleges, universities and HEIs in general. So BCA Programme at Bankura University is designed as per LOCF & and NEP-2020 as per UGC guidelines.

The main objective of BCA Programme program at Bankura University is to prepare a comprehensive course structure with detailed syllabus along with quality reading material in order to have a uniform standard of education in BCA Programme programme among students. This document shall serve as a model document across the higher education institutes (HEIs) in the country for teachers, students and academic administrators. It is a student centric framework where they are expected to learn fundamentals of computer science along with the latest trends and techniques like Artificial Intelligence, .NET Technologies, Digital Image Processing, Data Warehousing and Data Mining along with advanced skillsets that include Mobile Application Development, Object Oriented Programming among many other courses. It will help the students to be equipped with fundamental as well as advanced and latest technologies in computer science after completion of the programme

#### **Introduction:**

BCA Programme has been evolving as an important branch of science and engineering throughout the world in last couple of decades and it has carved out a space for itself like any other disciplines of basic science and engineering. BCA Programme is a discipline that spans theory and practice and it requires thinking both in abstract terms and in concrete terms. Nowadays, practically everyone is a computer user, and many people are even computer programmers. BCA Programme can be seen on a higher level, as a science of problem solving and problem solving requires precision, creativity, and careful reasoning. The ever-evolving discipline of computer science also has strong connections to other disciplines. Many problems in science, engineering, health care, business, and other areas can be solved effectively with computers, but finding a solution requires both computer science expertise and knowledge of the particular application domain.

BCA Programme has a wide range of specialties. These include Computer Architecture, Software Systems, Graphics, Artificial Intelligence, Computational Science, and Software Engineering. Drawing from a common core of computer science knowledge, each specialty area focuses on specific challenges. BCA Programme is practised by mathematicians, scientists and engineers. Mathematics, the origins of Computer Science, provides reason and logic. Science provides the methodology for learning and refinement. Engineering provides the techniques for building hardware and software.

# **BANKURA UNIVERSITY**

Bankura University has started BCA Programme in the year 2018, as this discipline evolved itself to a multidisciplinary discipline. Information Technology is growing rapidly. Increasing applications of computers in almost all areas of human endeavor has led to vibrant industries with concurrent rapid change in technology. Unlike other basic disciplines, developing core competency in this discipline that can be reasonably stable becomes a challenge.

## **Career Objective:**

BCA Programme are aimed at undergraduate level training facilitating multiple career paths. Students so graduated, can take up postgraduate programmes in Computer Science/Computer Application leading to research as well as R&D, can be employable at IT industries, or can pursue a teachers' training programme such B. Ed. in Computer Application, or can adopt a business management career. BCA Programme aims at laying a strong foundation of Computer Application at an early stage of the career. There are several employment opportunities and after successful completion of an undergraduate programme in BCA Programme, graduating students can fetch employment directly in companies as Web Developer, Software Engineer, Network Administrator, Data Scientist, or AI/ML personnel.

The Learning Outcome-based Curriculum Framework in BCA Programme is aimed at allowing flexibility and innovation in design and development of course content, in method of imparting training, in teaching learning process and in assessment procedures of the learning outcomes. The emphasis in BCA Programme course, in outcome-based curriculum framework, help students learn solving problems, accomplishing IT tasks, and expressing creativity, both individually and collaboratively. The proposed framework will help Students learn programming techniques and the syntax of one or more programming languages.

Many of the learning outcomes of BCA Programme can be achieved only by programming a computer for several different meaningful purposes. All students must, therefore, have access to a computer with a modern programming language installed. The computer science framework does not prescribe a specific language. The teacher and students will decide which modern programming languages students will learn. More importantly, students will learn to adapt to changes in programming languages and learn new languages as they are developed.

- The present Learning Outcome-based Curriculum Framework for BCA Programme is intended to facilitate the students to achieve the following.
- To develop an understanding and knowledge of the basic theory of Computer Science and Information Technology with good foundation on theory, systems and applications such as algorithms, data structures, data handling, data communication and computation.
- To develop the ability to use this knowledge to analyse new situations.
- To acquire necessary and state-of-the-art skills to take up industry challenges. The objectives and outcomes are carefully designed to suit to the above-mentioned purpose.
- The ability to synthesize the acquired knowledge, understanding and experience for a better and improved comprehension of the real-life problems.
- To learn skills and tools like mathematics, statistics, physics and electronics to find the solution, interpret the results and make predictions for the future developments.

# **BANKURA UNIVERSITY**

## **Curriculum Planning- Learning Outcomes-based Approach for BCA Programme:**

BCA Programme is generally a three-year degree program which develops advanced theoretical and research skills in subject. This programme helps in building an advanced professional or academic career. It is an appropriate course for students who wish to pursue a MCA, M. Sc. (Computer Science), MBA or Doctor of Philosophy (PhD) in CS and a research or academic career. This program facilitates students who wish to pursue an independent research project in an area of interest under the supervision of an academic

## **Aims of BCA Programme Programmes:**

The BCA Programme emphasizes problem solving in the context of algorithm development and software implementation and prepares students for effectively using modern computer systems in various applications. The curriculum provides required BCA Programme courses such as programming languages, data structures, computer architecture and organization, algorithms, database systems, operating systems, and software engineering; as well as elective courses in artificial intelligence, computer-based communication networks, distributed computing, information security, graphics, human-computer interaction, multimedia, scientific computing, web technology, and other current topics in computer science. The main aim of this Bachelor's degree is to deliver a modern curriculum that will equip graduates with strong theoretical and practical backgrounds to enable them to excel in the workplace and to be lifelong learners.

The purpose of the BCA Programme programs in are twofold:

- (1) to prepare the student for a position involving the design, development and implementation of computer software/hardware, and
- (2) to prepare the student for entry into a program of postgraduate study in computer science/engineering and related fields.

BCA Programme focus on the concepts and techniques used in the design and development of software systems. Students in this program explore the conceptual underpinnings of Computer Science -- its fundamental algorithms, programming languages, operating systems, and software engineering techniques. In addition, students choose from a rich set of electives that includes data science, computer graphics, artificial intelligence, database systems, computer architecture, and computer networks, among other topics. A generous allotment of free electives allows students to combine study in computer science with study in auxiliary fields to formulate a program that combines experiences across disciplines.

## **Programme Learning Outcomes for BCA Programme:**

The BCA Programme program enables students to attain, by the time of graduation:

- **PLO-A:** Demonstrate the aptitude of Computer Programming and Computer based problem solving skills.
- **PLO-B:** Display the knowledge of appropriate theory, practices and tools for the specification, design, implementation
- **PLO-C:** Ability to learn and acquire knowledge through online courses available at different MOOC Providers.
- **PLO-D:** Ability to link knowledge of Computer Science with other two chosen auxiliary disciplines of study.
- **PLO-E:** Display ethical code of conduct in usage of Internet and Cyber systems.
- **PLO-F:** Ability to pursue higher studies of specialization and to take up technical employment.
- **PLO-G:** Ability to formulate, to model, to design solutions, procedure and to use software tools to solve real world problems and evaluate.

# **BANKURA UNIVERSITY**

- **PLO-H:** Ability to operate, manage, deploy, configure computer network, hardware, software operation of an organization.
- **PLO-I:** Ability to present result using different presentation tools.
- **PLO-J:** Ability to appreciate emerging technologies and tools.
- **PLO-K:** Apply standard Software Engineering practices and strategies in real-time software project development
- **PLO-L:** Design and develop computer programs/computer -based systems in the areas related to algorithms, networking, web design, .NET Technology and data analytics.
- **PLO-M:** Acquaint with the contemporary trends in industrial/research settings and thereby innovate novel solutions to existing problems
- **PLO-N:** The ability to apply the knowledge and understanding noted above to the analysis of a given information handling problem.
- **PLO-O:** The ability to work independently on a substantial software project and as an effective team member.

## Curriculum and Credit Framework for

### BCA Programme

(Basic, Honours and Honours with Research)

With effect from the Academic Year : 2023-2024

#### SEMESTER – I

Sl. No.	Course Code	Course Title	Credit	Marks			No. of Hours		
				IA	ESE	Total	L	T	P
1	DSC-01	Computer Fundamentals	4	20	80 T:80 L:00	100	3	1	0
2	MNS-01	Elective-I	4	See in POOL OF MINOR STREAM (ELECTIVE)					
3	MDC-01	Mathematics-I	3	20	80 T:80 L:00	100	3	1	0
4	AEC-01	Communicative English-I	2	10	40 T:40 L:00	50	2	1	0
5	SEC-01	PC Software	3	20	80 T:50 L:30	100	3	1	4
6	VAC-01	Environmental Science	4	10	40 T:40 L:00	50	2	1	0
Total in Semester-I			20	100	400	500			

#### SEMESTER – II

Sl. No.	Course Code	Course Title	Credit	Marks			No. of Hours		
				IA	ESE	Total	L	T	P
1	DSC-02	Programming and Problem Solving through C-Language	4	20	80 T:50 L:30	100	3	1	4
2	MNS-02	Elective-II	4	See in POOL OF MINOR STREAM (ELECTIVE)					
3	MDC-02	Mathematics-II	3	20	80 T:80 L:00	100	3	1	0
4	AEC-02	Modern Indian Language – Bengali-I	2	10	40 T:40 L:00	50	2	1	0
5	SEC-02	Front End Web Design and Development	3	20	80 T:50 L:30	100	3	1	4
6	VAC-02 (A/B)	<b>Choose any one from the following</b> <ul style="list-style-type: none"> <li>A. Understanding India</li> <li>B. Health and Wellness</li> </ul>	4	10	40 T:40 L:00	50	2	1	0
Total in Semester-II			20	100	400	500			

<b>UG CERTIFICATE</b>	Student who opt to exit after completion of the first year (Semester-I & II) and have secure 40 credits will be awarded a <b>UG CERTIFICATE</b> if, in addition, the Summer Internship (4 Credit) during summer vacation of the first year.

Total in Semester-IV			22	110	440	550			

#### UG DIPLOMA

Student who opt to exit after completion of the second year (Semester-I, II, III & IV) and have secure 82 credits will be awarded a **UG DIPLOMA** if, in addition, the Summer Internship (4 Credit) during summer vacation of the second year.

<b>UG DEGREE (BCA)</b>	Student who wish to undergo three year UG Programme will be awarded <b>UG DEGREE (BCA)</b> after successful completion of three year (Semester-I, II, III, IV, V & VI).	

<b>UG DEGREE (Hons. With Research) (BCA (Hons. with Research))</b>		Students who secure 75% marks and above first six semesters and wish to undertake research at the undergraduate level can choose a research stream in the fourth year in replace of DSE-08, DSE-09 and DSE-10 papers of Semester-VIII. The students who secure 164 credits, including 12 credits from a research project/dissertation, are awarded <b>UG DEGREE (HONOURS WITH RESEARCH) (BCA (Hons. with Research))</b>							
<b>RESEARCH STREAM</b>

# **BANKURA UNIVERSITY**

## **Curriculum and Credit Framework for BCA Programme**

**(Basic, Honours and Honours with Research)**

### **Semester - I**

**Course Code: DSC-01**

**Course Title: Computer Fundamentals (4 Credit)**

#### **Course Objectives:**

The main objective of this course is to introduce the fundamentals of computing devices and reinforce computer vocabulary, particularly with respect to personal use of computer hardware and software, the Internet, networking and mobile computing. It focuses on such computer literacy that prepares students for life-long learning of computer concepts and skills. Students discover why computers are essential components in education, business and society in this course.

**Learning Outcomes:** After successfully completing this course, a student will be able to:

- Student will be able to identify the components of a personal computer system
- Student will be able to demonstrate mouse and keyboard functions
- Student will be able to demonstrate window and menu commands and how they are used
- Student will be able to demonstrate how to organize files and documents on a USB/hard drive
- Student will be able to compose, format and edit a word document

#### **Theory: 60 Lectures**

**Unit-I: Introduction:** Introduction to computers, Evolution of computer, characteristics and capabilities, Block Diagram of a Computer, Types of Computers: Analogue, Digital, Hybrid, General and Special Purpose Computers, Generation of Computers, Computer Systems: Micros, Minis & Main-frames, Limitations of Micro Computer.

**Unit-II: Number systems:** Decimal Number system, Binary number system, Octal & Hexadecimal number system, 1's&2's complement Codes: ASCH, EBCDI Codes, Gray code & BCD.

**Unit-III: Logic Gates:** AND, OR, NOT GATES and their Truth tables, NOR, NAND & XOR gates

**Unit-IV: Input Devices:** Categorizing Input Hardware, Keyboard, Direct Entry — Card Readers, Scanning Devices — O.M.R., Character Readers, Thumb Scanner, MICR, Smart Cards, Voice Input Devices, Pointing Devices — Mouse, Light Pen, Touch Screen.

**Unit-V: Output Devices:** Output Fundamentals, Hardcopy Output Devices, Impact Printers, Non-Impact Printers, Plotters, Computer output Microfilm/Microfiche (COM) systems, Softcopy Output Devices, Cathode Ray Tube, Flat Screen Technologies, Projectors, Speakers.

**Unit-VI: Central Processing Unit:** The Microprocessor, control unit, ALU, Registers, Buses, Main Memory, RAM,ROM.

**Unit-VII: Storage Devices:** Storage Fundamentals, Primary and Secondary Storage, Data Storage and Retrieval Methods — Sequential, Direct & Indexed Sequential, Tape Storage and Retrieval Methods Tape storage Devices, characteristics and limitations, Direct access Storage and Microcomputers – Hard Disks, Disk Cartridges, Direct Access Storage Devices for large Computer systems, Mass storage systems and Optical Disks, CD ROM.

# **BANKURA UNIVERSITY**

## **Curriculum and Credit Framework for BCA Programme**

**(Basic, Honours and Honours with Research)**

**Unit-VIII: Computer Software & Languages: System Software:** System software Vs. Application Software, Types of System Software, Introduction and Types of Operating Systems. Boot Loader, Diagnostic Programs, BIOS, Utility Programs.

**Application Software:** Microcomputer Software, Interacting with the System, Trends in PC software, Types of Application Software, Difference between Program and Packages.

**Computer Languages:** Definition, Generations of computer languages, Types of Languages, Language Processors: Assembler, Interpreter, Compiler, Linker and Loader.

**Unit-IX: Problem Solving:** Algorithms, Flow Charts, Decision Tables and Pseudo Code.

### **Reference Books:**

- Computer Fundamentals - P. K. Sinha
- Rajaraman V. -Fundamentals of computers, Prentics hall of India.
- Digital circuit and designs -S. Salivahanan, S. Arivazhagan - Vikash Publications.

### **Semester - I**

**Course Code: MNS-01A**

**Course Title: Introduction to Artificial Intelligence (4 Credit)**

### **Course Objectives:**

Introduction to AI is an introductory course in Artificial Intelligence. The goal is to acquire knowledge on intelligent systems and agents, formalization of knowledge, reasoning with and without uncertainty, machine learning and applications at a basic level.

### **Learning Outcomes:**

After the completion of this course, the students will be able to:

Identify problems where artificial intelligence techniques are applicable. Apply selected basic AI techniques; judge applicability of more advanced techniques. Participate in the design of systems that act intelligently and learn from experience.

### **Theory: 60 Lectures**

**Unit-I: Introduction to Artificial Intelligence:** Definition of AI, Future of Artificial Intelligence, Characteristics of Intelligent Agents, Typical Intelligent Agents.

**Unit-II: AI Project Cycle:** Definition, Flow chart (AI Project Cycle), Problem Scoping, Data Acquisition, Data Exploration, Modelling.

**Unit-III: Problem Solving Methods:** Problem solving Methods, Search Strategies, Uninformed and Informed Search, Local Search, Heuristics, Algorithms and Optimization Problems, Searching with Partial Observations, Constraint: Satisfaction Problems, Constraint Propagation, Backtracking Search, Game Playing, Optimal Decisions in Games, Alpha-Beta Pruning, Stochastic Games.

**Unit-IV: Knowledge Representation:** Knowledge Representation, First-Order Predicate Logic, Prolog Programming, Unification, Forward and Backward Chaining, Resolution, Ontological Engineering, Categories and Objects, Events, Mental Events and Mental Objects, Reasoning Systems for Categories, Reasoning with Default Information.

# **BANKURA UNIVERSITY**

## **Curriculum and Credit Framework for BCA Programme**

**(Basic, Honours and Honours with Research)**

**Unit-V: Software Agents:** Architecture for Intelligent Agents, Agent communication, Negotiation and Bargaining, Argumentation among Agents, Trust and Reputation in Multi-agent systems.

**Unit-VI: Artificial Intelligence Applications:** Artificial Intelligence applications, Language Models, Information Retrieval, Information Extraction, Natural Language Processing, Machine Translation, Speech Recognition, Robotics, Hardware and Software for Robots, Planning and Perception.

### **Reference Books:**

2. N. J. Nilson, Principle of AI, Narosa
3. Rich & Knight, Artificial Intelligence – Tata McGraw Hill, 2nd edition, 1991
4. Russell & Norvig, Artificial Intelligence-A Modern Approach, LPE, Pearson Prentice Hall, 2nd edition, 2005.

### **Semester - I**

**Course Code: MNS-01B**

**Course Title: Introduction to Data Science (4 Credit)**

### **Course Objectives:**

This course is intended to provide an introduction into the field of Data Science. Students will develop skills in appropriate technology and basic statistical methods by completing hands-on projects focused on real-world data and addresses the social consequences of data analysis and application.

### **Learning Outcomes:**

After the completion of this course, the students will be able to:

- Identify and describe the methods and techniques commonly used in data science.
- Demonstrate proficiency with the methods and techniques for obtaining, organizing, exploring, and analyzing data.
- Recognize how data analysis, inferential statistics, modeling, machine learning, and statistical computing can be utilized in an integrated capacity.
- Create and modify customizable tools for data analysis and visualization per the evaluation of characteristics of the data and the nature of the analysis.
- Demonstrate the ability to clean and prepare data for analysis and assemble data from a variety of sources

### **Theory: 60 Lectures**

**Unit – I: Introduction:** Introduction to Data Science – Evolution of Data Science – Data Science Roles – Stages in a Data Science Project – Applications of Data Science in various fields – Data Security Issues.

**Unit – II: Data Collection and Data Pre-Processing:** Data Collection Strategies – Data Pre-Processing Overview – Data Cleaning – Data Integration and Transformation – Data Reduction – Data Discretization.

**Unit – III: Exploratory Data Analytics:** Descriptive Statistics – Mean, Standard Deviation, Skewness and Kurtosis – Box Plots – Pivot Table – Heat Map – Correlation Statistics – ANOVA.

# **BANKURA UNIVERSITY**

## **Curriculum and Credit Framework for BCA Programme**

**(Basic, Honours and Honours with Research)**

**Unit – IV: Model Development:** Simple and Multiple Regression – Model Evaluation using Visualization – Residual Plot – Distribution Plot – Polynomial Regression and Pipelines – Measures for In-sample Evaluation – Prediction and Decision Making.

**Unit – V: Model Evaluation:** Generalization Error – Out-of-Sample Evaluation Metrics – Cross Validation – Overfitting – Under Fitting and Model Selection – Prediction by using Ridge Regression – Testing Multiple Parameters by using Grid Search.

3. David Dietrich, Barry Heller, Beibei Yang, “Data Science and Big data Analytics”, EMC 2013
4. Raj, Pethuru, “Handbook of Research on Cloud Infrastructures for Big Data Analytics”, IGI Global

### **Semester - I**

**Course Code: MNS-01C**

**Course Title: Introduction to Cyber Securities (4 Credit)**

### **Course Objectives:**

The objective of the courses to

- Understand the fundamental s of cyber security and cybercrimes.
- Understand the tools and methods in cybercrimes and understanding computer forensics.

### **Learning Outcomes:**

After the completion of this course, the students will be able to:

- Understand the basic concepts of cyber security and cybercrimes.
- Understand the security policies and cyber laws.

### **Theory: 60 Lectures**

**Unit-I: Introduction to Cybercrime:** Cybercrime- Definition and Origins of the Word Cybercrime and Information Security, Who are Cybercriminals? Classifications of Cybercrimes, A Global Perspective on Cybercrimes, Cybercrime Era: Survival Mantra for the Netizens. Cyber offenses: How Criminals Plan Them: How Criminals Plan the Attacks, Social Engineering, Cyberstalking, Cybercafe and Cybercrimes, Botnets: The Fuel for Cybercrime, Attack Vector, Cloud Computing.

**Unit-II: Cybercrime:** Mobile and Wireless Devices: Introduction, Proliferation of Mobile and Wireless Devices, Trends in Mobility, Credit Card Frauds in Mobile and Wireless Computing Era, Security Challenges Posed by Mobile Devices, Registry Settings for Mobile Devices, Authentication Service Security, Attacks on Mobile/Cell Phones, Mobile Devices: Security Implications for organizations, Organizational Measures for Handling Mobile, Organizational Security Policies and Measures in Mobile Computing Era, Laptops.

**Unit-III: Tools and Methods Used in Cybercrime:** Introduction, Proxy Servers and Anonymizers, Phishing, Password Cracking, Key loggers and Spywares, Virus and Worms, Trojan-horses and Backdoors, Steganography, DoS and DDoS At-tacks, SQL Injection, Buffer Overflow, Attacks on Wireless Networks. Phishing and Identity Theft: Introduction to Phishing, Identity Theft (ID Theft).

# **BANKURA UNIVERSITY**

## **Curriculum and Credit Framework for BCA Programme**

**(Basic, Honours and Honours with Research)**

**Unit-VI: Understanding Computer Forensics:** Introduction, Digital Forensics Science, The Need for Computer Forensics, Cyber forensics and Digital Evidence, Forensics Analysis of E-Mail, Digital Forensics Life Cycle, Chain of Custody Concept, Network Forensics, Approaching a Computer Forensics Investigation, Setting up a Computer Forensics Laboratory: Understanding the Requirements, Computer Forensics and Steganography, Relevance of the OSI 7 Layer Model to Computer Forensics.

**Unit-V: Forensics and Social Networking Sites:** The Security/Privacy Threats, Computer Forensics from Compliance Perspective, Challenges in Computer Forensics, Special Tools and Techniques, Forensics Auditing, Ant forensics.

**Unit-VI: Introduction to Security Policies and Cyber Laws:** Need for an Information Security Policy, Information Security Standards – ISO, Introducing Various Security Policies and Their Review Process, Introduction to Indian Cyber Law, Objective and Scope of the IT Act, 2000, Intellectual Property Issues, Overview of Intellectual Property Related Legislation in India, Patent, Copyright, Law Related to Semiconductor Layout and Design, Software License.

### **Semester - I**

**Course Code: MNS-01D**

**Course Title: Principles of Management (4 Credit)**

### **Course Objectives:**

To explain the evolution of Management and its principles, discuss the functions of management and their importance in business and propose the application of the principles of management in an organizational setup

### **Learning Outcomes:**

After the completion of this course, the students will be able to:

- Learners will absorb various management concepts such as planning, organizing, implementing, staffing, coordinating, controlling, motivating and Managerial Grid
- Learners will recognize the human skills and conceptual skills as per industry requirements about basic management skills.
- Learners will diagnose various styles and qualities of efficient leadership, Coordination, Controlling, Green Management and Corporate Social Responsibility.

**Theory: 60 Lectures**

# **BANKURA UNIVERSITY**

## **Curriculum and Credit Framework for BCA Programme**

**(Basic, Honours and Honours with Research)**

**Unit-I: Introduction to Management:** Definition, Features of Management, Management Functions, Management as a Process, Importance of Management, Management and Administration, Functional Areas of Management, Managerial Skills, Roles of a Manager, Levels of Management, Management as a Science as well as an Art.

**Unit-II: Planning:** Meaning and Definition, Features, Steps in Planning Process, Approaches, Principles, Importance, Advantages and Disadvantages of Planning, Types of Plans, Types of Planning, Management by Objectives.

**Unit-III: Decision-Making:** Meaning, Characteristics, Decision-Making Process, Guidelines for Making Effective Decision, Types of Decisions.

**Unit-IV: Organization and Organization Structure:** Organizing Process – Meaning and Definition, Characteristics, Process, Need and Importance, Principles, Span of Management. Organization Chart – Types, Contents, Uses, Limitations, Factors Affecting Organizational Chart, Organizational Structure – Line Organization, Line and Staff, Functional, Project, Matrix and Virtual.

**Unit-V: Staffing:** Meaning, Nature, Importance, Staffing Process – Manpower Planning, Recruitment, Selection, Orientation and Placement, Training, Remuneration, Performance Appraisal, Promotion and Transfer.

**Unit-VI: Direction and Supervision:** Direction – Definition, Nature, Need and Importance, Principles of Directing. Supervision – Role and Functions of a Supervisor, Effective Supervision, Direction and Supervision.

**Unit-VII: Controlling:** Meaning, Features, Importance, Control Process, Characteristics of an Effective Control System, Types of Control.

**Unit-VIII: Co-ordination:** Definition, Characteristics, Essentials, Types and Techniques, Principles, Obstacles and Needs.

**Unit-IX: Motivation and Leadership:** Motivation: Concept, Theories – Classical and Modern, Importance, Financial and Non-Financial Motivation, Positive and Negative Motivation, Group Motivation. Leadership: Definition, Meaning, Factors, Theories, Principles and Leadership Styles.

**Unit-X: Communication:** Definition, Meaning, Nature, Communication Process, Types and Barriers to Communication.

5. Management –Task Resp, Practices – PetaDruche “willian Heinemann LTD.
6. Gilbert: Principles of Management, McGraw Hill.

### **Semester - I**

**Course Code: MDC-01**

**Course Title: Mathematics-I (4 Credit)**

### **Course Objectives:**

# **BANKURA UNIVERSITY**

## **Curriculum and Credit Framework for BCA Programme**

**(Basic, Honours and Honours with Research)**

Be able to perform basic computations in higher mathematics. Be able to read and understand middle-level proofs. Be able to write and understand basic proofs. Develop and maintain problem-solving skills.

### **Learning Outcomes:**

After the completion of this course, the students will be able to:

- Understand the foundations of mathematics
- Be able to perform basic computations in higher mathematics
- Be able to read and understand middle-level proofs
- Be able to write and understand basic proofs
- Develop and maintain problem-solving skills
- Use mathematical ideas to model real-world problems
- Be able to communicate mathematical ideas with others
- Have experience using technology to address mathematical ideas

### **Theory: 60 Lectures**

**Unit-1: Algebra:** Sets, Union and Intersection, Complement, Mapping, Composition, notion of a Group, Ring, Field with simple examples.

**Unit-2: Complex Number:** Modulus and amplitude, De Moivre's theorem

**Unit-3:** Polynomials, Division algorithm, Fundamental theorem of classical algebra (Proof not required), Descartes rule of sign and their application, Relation between roots and coefficients; symmetric function of roots, Transformation of polynomial equation, Cardon's solution of cubic equation, Determinants, Addition and Multiplication of Matrices, Inverse of a Matrix ; Solution of linear equations in three variables by Cramer's rule and solution of three line linear equations by matrix inversion methods.

**Unit-4:** Vector spaces, Subspaces, Bases and Dimensions, Co-ordinates, Linear Transformation, The Algebra of Linear Transformations.

**Unit-5:** Vector Algebra: Scalars & vectors, vector addition, linear combination of vectors, condition of colinearity of three points, scalar and vector products, scalar triple product and vector triple product.

**Unit-6: Analytical Geometry:** Translation and rotation of rectangular axes, invariants, general equation of second degree-reduction to standard forms and classification. Plane polar equation of a straight line, circle, ellipse, parabola and hyperbola.

### **Reference Books:**

1. A Text book of Algebra- B.K. Lahiri & K. C. Roy
2. Linear Algebra- Das & Roy
3. Co-ordinate Geometry- S. L. Loney
4. Differential Calculus- Das and Mukherjee
5. Integral Calculus - Das and Mukherjee

### **Semester - I**

**Course Code: SEC-01**

# **BANKURA UNIVERSITY**

## **Curriculum and Credit Framework for BCA Programme**

**(Basic, Honours and Honours with Research)**

### **Course Title: PC Software (4 Credit)**

#### **Course Objectives:**

The main objective of this course is to introduce the fundamentals of PC Software and reinforce computer vocabulary, particularly with respect to personal use of computer software, the Internet, networking and mobile computing. It focuses on such computer literacy that prepares students for life-long learning of computer concepts and skills. Students discover why computers are essential components in education, business and society in this course.

**Learning Outcomes:** After successfully completing this course, a student will be able to:

- Student will be able to compose, format and edit a word document
- Student will be able to create worksheet, charts in excel
- Student will be able to create presentation in PowerPoint
- Student will be able to send email messages (with or without attachments)
- Student will be able to navigate and search through the internet

**Unit-I: Overview of OS:** Introduction to DOS, Internal and external commands, batch files (autoexec.bat, config.sys), Line editors, History of Windows (Windows 3.x to up-to-date version), Desktop, user interface action, icon on desktop, closing windows, renaming icons, resizing windows (maximizing and minimizing). Control panel.

**Unit-II: Overview of MS-Word:** Introduction to word, Overview, creating, saving, opening, importing, exporting, and inserting files, formatting pages, paragraphs and sections, indents and outdents, creating lists and numbering. Headings, styles, fonts and font size, editing, positioning, viewing texts, searching and replacing text, inserting page breaks, page numbers, bookmarks, symbols, and dates. Using tabs and tablets, header, footer, and printing, mail merge and labels.

**Unit-III: Overview of MS-Excel:** Getting started with Excel, Worksheet overview, entering information, Editing cell, commands and functions, moving and copying, Inserting and deleting rows and columns, printing worksheet, Creating Charts, Naming range and using statistical, math, and financial function, database in a worksheet, Additional formatting commands and drawing toolbars, Other commands and functions

**Unit-VI: Overview of Power points:** Slide creation with PowerPoint, presenting shows for corporate and commercial using power point.

**Unit-V: Overview of Cloud Management with Security of Data:** Introduction to MS-Teams and MS-SharePoint, Basic Document Management and Document Library, Excel Power Query, MS-Teams App Store, Creating webpages and web parts, Creating forms and Surveys, Restricted Access Management for data security, Integration of MS-SharePoint with MS-Teams.

**Unit-VI: Introduction to Internet:** Basic internet terms, getting connecting to internet, Internet applications, E-mails, Searching the web, Search engine, and computer viruses.

#### **Reference Books:**

1. Introduction to Computers with MS-Office-Leon, TMH

#### **Practical:**

# **BANKURA UNIVERSITY**

## **Curriculum and Credit Framework for BCA Programme**

**(Basic, Honours and Honours with Research)**

1. Create a bio data and manipulate text and format using MS-Word.
2. Create a document and design a department invitation using formatting option.
3. Create a document and to insert picture in right side and related information in left side using page layout option in MS-Word.
4. Create text manipulation and mathematics equation with scientific notations.
5. Create your college class timetable using table option in MS- Word.
6. Create a Student mark analysis table using table option in MS- Word.
7. Create a Student mark analysis table and apply formula to Total, Average using formula function in MS-Word. And then convert the Student Mark Table into text using convert option in MS- Word.
8. To write a Student mark statement letter and merge the draft with student's academic database using mail merge on a letter head in MS-Word.
9. To draw a flowchart to find sum of two numbers using drawing toolbars in MS-Word.
10. To create a flowchart for course chart using drawing toolbars in MS-Word.
11. Do the following task in MS Excel
  - a. Create a Blank workbook
  - b. Save the Workbook as ExcellabOne.xlsx in Document > MSExcelsLabs folder
  - c. Type "Working with Excel Math" in cell A1
  - d. Merge and Center the text in cell A1 to the range A1:E1
  - e. Apply Title style to the range A1:E1
  - f. Type Addition in cell A2
  - g. Type Subtraction in cell A3
  - h. Type Multiplication in cell A4
  - i. Type Division in cell A5
  - j. Auto-fit the contents in column A
  - k. Insert a row above row #2
  - l. Type "Basic Math" in cell A2
  - m. Merge and Center the text in cell A2 to the range A2:E2
  - n. Apply Heading 4 to the range A2:E2
  - o. Apply the Calculation Style to the range A3:A6
  - p. Type = 4 + 6 / 2 in cell B3 then type = (4 + 6) / 2 in cell D3
  - q. Type = 6 - 6 \* 2 in cell B4 then type = (6 - 6) \* 2 in cell D4
  - r. Type = 2 \* 2 + 6 in cell B5 then type = (2 \* 2) + 6 in cell D5
  - s. Type = 9 / 3 + 4 in cell B6 then type = ( 9 / 3 ) + 4 in cell D6
  - t. Press Ctrl + ~ then press Ctrl + ~ again
  - u. Save and submit ExcellabOne.xlsx to your instructor
12. Use of Formulas Sum, Average, If, Count, Counta, Countif & Sumif

Roll No	Student Name	Bengali	English	Math	Physics	Chemistry	Total	Average	Grade
1	RAM	20	10	14	18	15	77	15.4	A
2	ASHOK	21	12	14	12	18	?	?	?
3	MANOJ	33	15	7	14	17	?	?	?
4	RAJESH	15	14	8	16	20	?	?	?
5	RANJANA	14	17	10	13	18	?	?	?

# **BANKURA UNIVERSITY**

## **Curriculum and Credit Framework for BCA Programme**

**(Basic, Honours and Honours with Research)**

6	POOJA	16	8	20	17	15	?	?	?
7	MAHESH	18	19	3	10	14	?	?	?
8	ASHUTOSH	19	20	7	14	18	?	?	?
9	ANIL	22	13	8	12	19	?	?	?
10	PREM	26	12	10	11	27	?	?	?

Q.a Find the Total Number & Average in all Subjects in Each Student.

Q.b Find Grade Using If Function - If Average Greater >15 then "A" Grade otherwise "B" Grade

Q.c How Many Student "A" and "B" Grade Use of Countif

Q.d Student Ashok and Manoj Total Number and Average Use of Sumif

Q.e Count how many Students Use of Counta

Q.f How Many Student Bengali & English Subject Number Grater Then > 20 and <15 Use of Countif

### 13. Use of Formulas - Product, If, Counta, Countif, Sumif

SRNO	ITEMS	QTY	RATE	AMOUNT	GRADE
1	AC	20	40000	800000	Expensive
2	FRIDGE	30	20000	?	
3	COOLER	15	10000	?	
4	WASHING MACHINE	14	15000	?	
5	TV	18	20000	?	
6	FAN	17	2000	?	
7	COMPUTER	10	25000	?	
8	KEYBOARD	5	250	?	
9	MOUSE	25	100	?	
10	PRINTER	30	12000	?	

Q. a Using of Product Fomula for Calculate Amount = Qty\*Rate

Q. b How Many Items in a List

Q. c How Many Items qty Greate Then > 20 and Less Then <20

Q. d Calculate Item Computer Qty, Rate and Amount using Sumif Formula

Q. e If Items Amount is Greater > 500000, Then Items "Expensive" otherwise "Lets Buy it".

### 14. Sales Report (Use of Formulas - Sum, If, Counta, Countif, Sumif, Vlookup, Lookup)

SALESMAN	JAN	FEB	MAR	APR	MAY	JUNE	SALES	TARGET	RESULT
RAMESH	2000	1500	300	1400	1000	1400	7600	10000	NOT ACHIVED
RAKESH	5000	1200	500	1200	1200	2800	?	12000	?

# **BANKURA UNIVERSITY**

## **Curriculum and Credit Framework for BCA Programme**

**(Basic, Honours and Honours with Research)**

RAHUL	3000	800	1200	3000	1500	3500	?	18000	?
POOJA	1000	900	1800	5000	1400	1200	?	10000	?
MANOJ	500	1000	2300	8000	1700	1400	?	12000	?
ASHOK	800	500	2400	1900	1800	1800	?	10000	?
AJEET	1200	1400	1500	700	2500	7000	?	12000	?
ALOK	1500	1800	1800	1800	300	1500	?	10000	?
AMRIT	1800	2500	1700	1500	2800	1800	?	12000	?
SURENDRA	200	3000	1900	1200	1500	3000	?	10000	?
SHASHI	1600	1200	2000	800	1700	800	?	10000	?

15. Create an excel worksheet of your own and insert data. Then create a Pie chart for the data.
16. Create an excel worksheet of your own and insert data. Then create a line chart for the data.
17. Create an excel worksheet of your own and insert data of students with their percentage of marks. Now implement conditional formatting to distinguish students percentage like the following.  
(percentage>=60 Green. percentage>=45 Yellow, percentage<34 RED)
18. Create an excel worksheet of your own and insert student data in it. Now implement freeze pane to lock column heading, and student roll and name.
19. Do the following task in power point.
  - a. Open a Blank presentation
  - b. Save the presentation as PowerPointLabOne.pptx
  - c. Add a Title to the first slide: the name of your college
  - d. Type your first name and last name in the Subtitle section
  - e. Add a New Slide which has a Title and Content
  - f. Add a title to the second slide "My Future Goals"
  - g. In the Content section of the second slide, add at least three Personal Goals
  - h. Right click on the second slide from the left panel, then choose Duplicate Slide
  - i. Highlight the text in the Content area of the third slide. Under the Home tab, click Convert to SmartArt, then choose Basic Cycle
  - j. Change the SmartArt Colors to Colorful—Accent Colors
  - k. Change the SmartArt Styles to 3D Polished
  - l. From the left panel, drag the third slide between the first and second slide
  - m. Change the layout of the third slide, the slide that does not have the SmartArt, to Comparison
  - n. Leave the title "My Future Goals"
  - o. In the head of the first column, type "Goals in College," then center the heading
  - p. In the head of the second column, type "Goals after College," then center the heading
  - q. Add at least three goals in each section
  - r. Make sure that slide #3 is selected from the left panel, then add a New Slide
  - s. Change the layout of the new slide to Blank
  - t. Insert a Graduation Online Picture from the Office ClipArt—Choose any image of your choice
  - u. Change the ClipArt size to 3" X 3" and position it in the middle of the slide
  - v. Apply the Wisp Design Theme
  - w. Save and upload PowerPointLabOne.pptx to your instructor
20. Create a five (5) slide presentation about your City.

# **BANKURA UNIVERSITY**

## **Curriculum and Credit Framework for BCA Programme**

**(Basic, Honours and Honours with Research)**

21. Create a five (5) slide presentation for Environment awareness.
22. Create a five (5) slide presentation about tourist spots in Bankura.
23. Create a five (5) slide presentation about Prospects of BBA (H) course.
24. Create a five (5) slide presentation on prevention of Road accident.
25. Create a five (5) slide presentation on prevention of pollution in your area.
26. MS-Team
  - a. Create a new Team.
  - b. Add 2 owners.
  - c. Add 3 Members.
  - d. Restrict access of members to only view file with visitor category.
  - e. Provide edit access to owners.
  - f. Create 2 folders named Confidential and All documents.
  - g. Restrict access of confidential folder to only the owners, the members should not be able to view the contents of the folder name Confidential.
  - h. Owners should be able to view all folders.
27. Power Query
  - a.
    - i. Connect to Employee Data file – (Multiple Raw Files to be made available in Lab)
    - ii. Replace missing gender & department values
    - iii. Remove employees without salary
    - iv. Extract employee's country and remove address column
    - v. Extract year of join
    - vi. Publish data to Excel
  - b.
    - i. Connect to web source, the database of Member of Parliament of India
    - ii. Make a power query to automatically update the database, whenever any alteration in the list.
    - iii. Make a graph show case the various metrics in the list, eg, who has the max MPs, who has the max qualifies MPs, who has the most rich MPs etc
  - c.
    - i. Connect to the Share market live database and make a connection auto refresh, every 30 seconds
    - ii. The report should show top 10 stocks and bottom 10 stocks
28. Website using SharePoint and MS – Teams
  - a. Create a Website of your college and include the weather of the 4 metro cities with auto update
  - b. Provide only view access to 3 people
  - c. Include point 2 from the power query as graphs in your website.
  - d. Include point 3 from the power query as excel input to display the result.

### **Semester - II**

**Course Code: DSC-02**

**Course Title: Programming and Problem Solving through C-Language (4 Credit)**

#### **Course Objectives:**

The course is designed to provide complete knowledge of C language. Students will be able to develop logics which will help them to create programs, applications in C. Also by learning the basic programming constructs they can easily switch over to any other language in future.

# **BANKURA UNIVERSITY**

## **Curriculum and Credit Framework for BCA Programme**

**(Basic, Honours and Honours with Research)**

### **Learning Outcomes:**

After the completion of this course, the students will be able to develop applications through C Programming Language.

### **Theory: 60 Lectures**

**Unit-1: Introduction to C:** History of C, Overview of Procedural Programming and Object-Orientation Programming, Using main() function, Compiling and Executing Simple Programs in C.

**Unit-2: Data Types, Variables, Constants, Operators and Basic I/O:** Declaring, Defining and Initializing Variables, Scope of Variables, Using Named Constants, Keywords, Data Types, Casting of Data Types, Operators (Arithmetic, Logical and Bitwise), Using Comments in programs, Character I/O (getc, getchar, putc, putchar etc), Formatted and Console I/O (printf(), scanf()), Using Basic Header Files (stdio.h, conio.h etc).

**Unit-3: Expressions, Conditional Statements and Iterative Statements:** Simple Expressions in C (including Unary Operator Expressions, Binary Operator Expressions), Understanding Operators Precedence in Expressions, Conditional Statements (if construct, switch-case construct), Understanding syntax and utility of Iterative Statements (while, do-while, and for loops), Use of break and continue in Loops, Using Nested Statements (Conditional as well as Iterative)

**Unit-4: Functions and Arrays:** Utility of functions, Call by Value, Call by Reference, Functions returning value, Void functions, Inline Functions, Return data type of functions, Functions parameters, Differentiating between Declaration and Definition of Functions, Command Line Arguments/Parameters in Functions, Functions with variable number of Arguments.

Creating and Using One Dimensional Arrays (Declaring and Defining an Array, Initializing an Array, Accessing individual elements in an Array, Manipulating array elements using loops), Use Various types of arrays (integer, float and character arrays / Strings) Two- dimensional Arrays (Declaring, Defining and Initializing Two Dimensional Array, Working with Rows and Columns), Introduction to Multi-dimensional arrays

**Unit-5: Derived Data Types (Structures and Unions):** Understanding utility of structures and unions, declaring, initializing and using simple structures and unions, Manipulating individual members of structures and unions, Array of Structures, Individual data members as structures, Passing and returning structures from functions, Structure with union as members, Union with structures as members.

**Unit-6: Pointers in C:** Understanding a Pointer Variable, Simple use of Pointers (Declaring and Dereferencing Pointers to simple variables), Pointers to Pointers, Pointers to structures, Problems with Pointers, Passing pointers as function arguments, Returning a pointer from a function, using arrays as pointers, Passing arrays to functions. Pointers vs. References, Declaring and initializing references, Using references as function arguments and function return values.

**Unit-7: Memory Allocation in C:** Differentiating between static and dynamic memory allocation, use of malloc, calloc and free functions, storage of variables in static and dynamic memory allocation.

**Unit-8: File I/O, Preprocessor Directives:** Opening and closing a file, Reading and writing Text Files, Using put(), get(), read() and write() functions, Random access in files, Understanding the Preprocessor Directives.

# **BANKURA UNIVERSITY**

## **Curriculum and Credit Framework for BCA Programme**

**(Basic, Honours and Honours with Research)**

### **Reference Books:**

- C: The Complete Reference, Herbtz Schildt, Fourth Edition, McGraw Hill.2003
- Programming in C - B. S. Gottfried (Sahaum Series)
- Programming in ANSI C- E. Balaguruswami ( TMH )
- Let us C, Y Kanetkar, BPB

### **Practical:**

1. Develop a program to solve simple computational problems using arithmetic expressions and the use of each operator leading to the simulation of a commercial calculator. (No built-in math function)?
2. Write a C program to find all odd numbers between 150 to 300.
3. Write a C program to find LCM of two (2) number.
4. Write a C program to find all 4-digit number which are divisible by 5, 7 and 3.
5. Develop a program to compute the roots of a quadratic equation by accepting the coefficients. Print appropriate messages?
6. Write a C program to print the following pattern.

```
*
* *
* * *
* * * *
* * * * *
```

7. Write programs to display each of the following patterns.

```
* * * * *
* * * *
* * *
* *
*
```

8. Write programs to display each of the following patterns.

```
* * * * *
* * *   * * *
* *       * *
*         *
```

9. Write programs to display each of the following patterns.

```
1
2 6
3 7 10
4 8 11 13
5 9 12 14 15
```

10. Design and develop an algorithm to find the reverse of an integer number NUM and check whether it is PALINDROME or NOT. Implement a C program for the developed algorithm that takes an integer number as input and output the reverse of the same with suitable messages. Ex: Num: 2014, Reverse: 4102, Not a Palindrome

# **BANKURA UNIVERSITY**

## **Curriculum and Credit Framework for BCA Programme**

**(Basic, Honours and Honours with Research)**

11. Design and develop a C program to read a year as an input and find whether it is leap year or not. Also consider end of the centuries.
12. Draw the flowchart and Write a C Program to compute  $\sin(x)$  using Taylor series approximation given by  $\sin(x) = x - (x^3/3!) + (x^5/5!) - (x^7/7!) + \dots$
13. Design develop and Write c program compute cosine (x) .(hint:  $1 - (1/2!)x^2 + (1/4!)x^4 - (1/6!)x^6$  ) using Taylor series.
14. Write a program in C to find the factorial of a number without using recursive C function.
15. Write a c –code to determine whether the given number is prime or not using function.
16. Develop a program to find the reverse of a string and check for palindrome or not Display appropriate messages?
17. An Electricity board charges the following rates for the use of electricity: for the first 200 units 80 paise per unit: for the next 100 units 90 paise per unit: beyond 300 units Rs. 1 per unit. All users are charged a minimum of Rs. 100 as meter charge. If the total amount is more than Rs. 400, then an additional surcharge of 15% of total amount is charged. Write a program to read the name of the user, number of units consumed and print out the charges.
18. Implement using functions to check whether the given number is prime and display appropriate messages (No built-in math function)
19. Develop a program to introduce 2D Array manipulation and implement Matrix multiplication and ensure the rules of multiplication are checked.
20. Write a C program to implement 2D array using pointer.
21. Develop a program to compute  $\sin(x)$  using Taylor series approximation. Compare your result with the built-in Library function. Print both the result with appropriate messages
22. Develop a program to sort the given set of N numbers using any sorting algorithm.
23. Develop a program to find the square root of a given number N and execute for all possible Inputs with appropriate messages. Note: Don't use library function  $\sqrt{n}$ .
24. Implement structures to read, write, and compute average marks and the students scoring above and below the average marks for a class of N students
25. Develop a program using pointers to compute the sum and standard deviation of all elements stored in an array of n real numbers.
26. Write a C program to sort an array of structure (roll, name, total marks) in ascending order of total marks.
27. Implement Recursive functions for binary to Decimal Conversion
28. Write a function to implement string operations such as compare, concatenate, string length. Convince the parameters passing techniques
29. Write a C program to insert five (5) records in a file and display it.
30. Write a C program to insert five (5) records in a file and display it, then find a match of a record provided by the user.

### **Semester - II**

**Course Code: MNS-02A**

**Course Title: Introduction to Machine Learning (4 Credit)**

#### **Course Objectives:**

- To understand the basic theory underlying machine learning.
- To be able to formulate machine learning problems corresponding to different applications.

# **BANKURA UNIVERSITY**

## **Curriculum and Credit Framework for BCA Programme**

**(Basic, Honours and Honours with Research)**

- To understand a range of machine learning algorithms along with their strengths and weaknesses.
- To be able to apply machine learning algorithms to solve problems of moderate complexity.
- To apply the algorithms to a real-world problem, optimize the models learned and report on the expected accuracy that can be achieved by applying the models.

### **Learning Outcomes:**

After the completion of this course, the students will be able to:

- Appreciate the importance of visualization in the data analytics solution
- Apply structured thinking to unstructured problems
- Understand a very broad collection of machine learning algorithms and problems
- Learn algorithmic topics of machine learning and mathematically deep enough to introduce the required theory
- Develop an appreciation for what is involved in learning from data.

### **Theory: 60 Lectures**

**Unit-I: Introduction:** Machine Learning Foundations – Overview – Design of a Learning System – Types of Machine Learning – Supervised Learning and Unsupervised Learning – Mathematical Foundations of Machine Learning – Applications of Machine Learning.

**Unit-II: Supervised Learning – I:** Simple Linear Regression – Multiple Linear Regression – Polynomial Regression – Ridge Regression – Lasso Regression – Evaluating Regression Models – Model Selection – Bagging – Ensemble Methods.

**Unit-III: Supervised Learning – II:** Classification – Logistic Regression – Decision Tree Regression and Classification – Random Forest Regression and Classification – Support Vector Machine Regression and Classification - Evaluating Classification Models.

**Unit-IV: Unsupervised Learning:** Clustering – K-Means Clustering – Density-Based Clustering – Dimensionality Reduction – Collaborative Filtering.

**Unit-V: Association Rule Learning and Reinforcement Learning:** Association Rule Learning – Apriori – Eclat – Reinforcement Learning – Upper Confidence Bound – Thompson Sampling – Q-Learning.

**Unit-VI: Neural network:** Perceptron, multilayer network, backpropagation, introduction to deep neural network.

12. Gavin Hackling, "Machine Learning with scikit-learn", Packet publishing, O'Reilly, 2018.
13. Stanford Lectures of Prof. Andrew Ng on Machine Learning

# **BANKURA UNIVERSITY**

## **Curriculum and Credit Framework for BCA Programme**

**(Basic, Honours and Honours with Research)**

### **Semester - II**

**Course Code: MNS-02B**

**Course Title: Data Security and Privacy (4 Credit)**

#### **Course Objectives:**

The course will cover major developments in statistical data privacy and security, fundamentals of state-of-the-art privacy methods used in the digital world, as well as recent research trends in privacy and security. The course is intended to: (i) provide students with breadth in the areas of data privacy and security through lectures and homework assignments; and (ii) enable students to specialize in a privacy-related or security-related topic.

#### **Learning Outcomes:**

After the completion of this course, the students will be able to:

- To know the concept of Data Security and privacy including personally private information, potential violations of privacy due to security mechanisms, and describe how privacy protection mechanisms run in conflict with security mechanisms.
- To know how an attacker can infer a secret by interacting with a database.
- To know how to set password refresh policy.
- Describe the consequences of data retention policies.

### **Theory: 60 Lectures**

**Unit-I: Fundamentals of Data Security & Privacy:** Definition, difference between security and privacy, Databases and Exploratory Data Analysis, Data Representation and Storage, Authentication and Authorization, Database Security.

**Unit-II: Threats:** Definition, types of malware, how malware spread, malware protection, password protection, E-mail security.

**Unit-III: Anonymization:** Linkage and re-identification attacks, k-anonymity, l-diversity, t-closeness, Implementing anonymization, Anonymizing complex data, Privacy and anonymity in mobile environments.

**Unit-IV: Differential Privacy (DP):** Formalism and interpretation of DP, Fundamental DP mechanisms and properties, Interactive and non-interactive DP, DP for complex data, Local Differential Privacy (LDP).

**Unit-V: Security and Privacy in AI and Machine Learning (AI/ML):** Machine Learning (ML) background, Adversary modeling in AI/ML, Poisoning, evasion, and backdoor attacks, Test-time attacks: Model inversion, model stealing, **membership** inference, adversarial examples. Architectures and algorithms for privacy-preserving machine learning

#### **Reference Books:**

1. Data Privacy and Security (Hb) by Salomon D., Springer
2. Data Protection and Privacy Implementation: India Perspective, Rk Dubey, Ajay Kr Verma

### **Semester - II**

**Course Code: MNS-02C**

**Course Title: Cyber Law in India (4 Credit)**

# **BANKURA UNIVERSITY**

## **Curriculum and Credit Framework for BCA Programme**

**(Basic, Honours and Honours with Research)**

### **Course Objectives:**

The objective of the courses to

- Concepts of Technology and Law.
- Providing elementary understanding the authorities under IT Act.
- Penalties & Offences under IT Act.
- Cyber Space Jurisdiction.
- Scope of Cyber Laws.

### **Learning Outcomes:**

After the completion of this course, the students will be able to:

- Technicalities of law in Cyber World.
- Extensive knowledge regarding jurisdictional issues in IT Act.
- Various important national and international cyber laws.
- Understands the scope of Cyber Law.
- The students are able to understand the basic concept of International Technology.
- 

### **Theory: 60 Lectures**

**Unit-I: Introduction:** History of Internet and World Wide Web, Need for cyber law, Cyber crime on the rise, Important terms related to cyber law.

**Unit-II: Cyber law in India:** Need for cyber law in India, History of cyber law in India, Information Technology Act, 2000, Overview of other laws amended by the IT Act, 2000, National Policy on Information Technology 2012.

**Unit-III: Information Technology Act:** Overview of the Information Technology Act, 2000

**Unit-IV: Rules issued under the IT Act:** Overview of Rules issued under the IT Act, 2000

**Unit: V:** Electronic commerce and Electronic contracts.

**Unit: VI: Cyber crimes and Cyber Frauds:** Definition of cyber crime, First Cyber crime, Types of cyber frauds, Cyber frauds in India, Preventive measures, Cyber crimes, Who commits cyber crimes?, Penalties and offences under the IT Act, 2000, Offences under other legislations, Investigation of cyber crimes in India.

**Unit-VII: Regulatory Authorities:** Department of Electronics and Information Technology, Controller of Certifying Authorities (CCA), Cyber Appellate Tribunal, Indian Computer Emergency Response Team (ICERT),

**Unit-VIII: Case Laws:** State of Tamil Nadu Vs Suhas Katti, Syed Asifuddin and Ors. V. The State of AP. & Anr., P.R. Transport Agency Vs. Union of India (UOI), SMC Pneumatics (India) Private Limited v. Jogesh Kwatra, Ritu Kohli case, Avnish Bajaj Vs. State (N.C.T.) of Delhi.

### **Reference Books:**

2. Farouq Ahmed, Cyber Law in India, New Era publications, New Delhi.
3. S.R.Myneni: Information Technology Law(Cyber Laws), Asia Law House, Hyderabad.
4. Chris Reed, Internet Law-Text and Materials, Cambridge University Press.

# **BANKURA UNIVERSITY**

## **Curriculum and Credit Framework for BCA Programme**

**(Basic, Honours and Honours with Research)**

5. Pawan Duggal: Cyber Law- the Indian perspective Universal Law Publishing Co., New Delhi

### **Semester - II**

**Course Code: MNS-02D**

**Course Title: System Analysis and Design (4 Credit)**

#### **Course Objectives:**

This course examines the systems analysis and design process from understanding what a system should do through how a system should be implemented.

#### **Learning Outcomes:**

After the completion of this course, the students will be able to:

- Define the system development life cycle.
  - Conducts research on existing systems.
  - Develop plans for the new system.
- Make the feasibility study about the system.
  - Explore the technical risks involved in the system's and technical possibilities.
  - Scheduling with using GANTT and PERT techniques.
  - Evaluates the economic self-sufficiency whether to install the system.
- Carry out the system analysis.
  - Identifies problems in the system.
  - Determine the cause of the problem in the system.
  - Find a solution of the problem in the system.

### **Theory: 60 Lectures**

**Unit-I: Basic Concept of Systems:** Basic Concept of Systems The System: Definition and Concepts; Elements of a System: Input, Output Processor, Control, Feedback, Environment, Boundaries and Interface; Characteristics of a System; Types of systems -Physical and Abstract System, Open and Closed Systems, Man-made Systems; Information and its categories

**Unit-II: Information System and System Analyst:** Information Systems: TPS, OAS, MIS, DSS, ESS; System Analyst: Role and need of system analyst, System Analyst as an agent of change.

**Unit-III: System Development Life Cycle:** Introduction to SDLC, Various phases: study, analysis, design, development, testing, implementation, maintenance; System documentation: Types of documentation and their importance.

**Unit-IV: System Planning and Information Gathering:** Initial Investigations, Identification of user needs, Project Identification and Selection; Needs of Information Gathering, Determination of requirements, Information gathering tools: interviews, group communication, questionnaires, presentations and site visits.

**Unit-V: Feasibility Study:** Definition, Importance of feasibility study, Types of feasibility study, System selection plan and proposal, Prototyping, Cost-Benefit Analysis: Tools and Techniques.

# **BANKURA UNIVERSITY**

## **Curriculum and Credit Framework for BCA Programme**

**(Basic, Honours and Honours with Research)**

**Unit-VI: Tools for System Analysis:** Data Flow Diagram (DFD), Logical and Physical DFDs, Developing DFD; System Flowcharts and Structured charts, Structured English, Decision trees and Decision tables.

**Unit-VII: System Design:** Module specifications, Module Coupling and cohesion, Top-down and bottom-up design; Logical and Physical design, Structured design.

**Unit-VIII: Input and Output:** Input Design: Input data, Input media and devices; Output design; Form Design: Classification of forms, Requirements of Form design.

**Unit-IX: System Implementation and Maintenance:** Need of System Testing, Types of System Testing, Quality Assurance; System Conversion, Conversion methods, procedures and controls, System evaluation and performance, Maintenance activities and issues.

**Unit-X: System Security and Audit:** System Security, Security Threats, Risk Analysis, Control measures, System Audit, Disaster Recovery Planning

### **Reference Books:**

1. V. Rajaraman, Analysis and Design of Information System, PHI
2. Elias m. Awad: System Analysis and Design
3. 2. Perry Edwards: System Analysis & design Mc Graw Hill

### **Semester - II**

**Course Code: MDC-02**

**Course Title: Mathematics-II (4 Credit)**

### **Course Objectives:**

Be able to perform basic computations in higher mathematics. Be able to read and understand middle-level proofs. Be able to write and understand basic proofs. Develop and maintain problem-solving skills.

### **Learning Outcomes:**

After the completion of this course, the students will be able to:

- Understand the foundations of mathematics
- Be able to perform basic computations in higher mathematics
- Be able to read and understand middle-level proofs
- Be able to write and understand basic proofs
- Develop and maintain problem-solving skills
- Use mathematical ideas to model real-world problems
- Be able to communicate mathematical ideas with others
- Have experience using technology to address mathematical ideas

### **Theory: 60 Lectures**

**Unit-1: Differential Calculus:** Limit of a function and continuity. Fundamental properties of continuous functions (proofs not required); Derivative and Differential-Geometric meaning, Rules of Differentiation. Successive differentiation.

# **BANKURA UNIVERSITY**

## **Curriculum and Credit Framework for BCA Programme**

**(Basic, Honours and Honours with Research)**

**Unit-2:** Rolle's theorem, Mean-Value theorems, Taylor's and Maclaurin's theorems with Cauchy's and Lagrange's forms of remainder; Taylor's series. Functions of several variables. Partial Derivatives. Total Differential. Euler's theorem on homogeneous functions of two variables. Application to plane curves.

**Unit-3: Integral Calculus:** Rules of Integration of Indefinite Integrals, Solution of Definite Integrals and their elementary properties. Idea of improper integrals.

**Unit-4: Differential Equations:** order, degree, solution and formation of a differential equation. Standard techniques of solving a linear differential equation with constant coefficients. Cauchy's and Ligendre's Liner Differential Equations with variable coefficients.

**Unit-5: Sequence and Series:** Bounded and unbounded sequences, Convergence or divergence of a sequence, Behaviour of monotone sequences, Algebra of convergent sequences, Cauchy sequence, Cauchy's general principle of convergence, Infinite series, it's convergence and sum, series with positive terms and standard tests of convergence (without proofs), Alternating Series, Leibniz Test, Absolute convergence, Rearrangement of absolutely convergent series, Test of convergence of Abel and Dirichlet (without proofs)

### **Reference Books:**

4. Differential Equations - Sheplay I. ( John Wiley & Sons, Inc )
5. Linear Algebra - Kenneth Hoffman & Ray Kunze ( PHI )
6. Mathematical Analysis - S. C. Malic ( Wiley Eastern Limited )
7. Differential Calculus – Das and Mukherjee
8. Integral Calculus – Das and Mukherjee

### **Semester - II**

**Course Code: SEC-02**

**Course Title: Front End Web Design and Development (4 Credit)**

### **Course Objectives:**

To introduce the basic concepts and techniques of client-side web programming and too enable the students to develop simple, interactive, and stylish websites using HTML, CSS and JavaScript.

### **Learning Outcomes:**

After the completion of this course, the students will be able to:

- After studying this course, students will be able to build websites using the elements of HTML.
- After studying this course, students will be able to build interactive and stylish websites using client-side programming techniques with CSS and Javascript.
- After studying this course, students will be able to learn to validate client-side data.
- After studying this course, students will be able to define the structure and contents of the website using different features of CSS.

### **Theory: 60 Lectures**

**Unit-I: Introduction:** Introduction to internet and web design. Basic concepts of web architecture.

# **BANKURA UNIVERSITY**

## **Curriculum and Credit Framework for BCA Programme**

**(Basic, Honours and Honours with Research)**

**Unit-II: HTML:** Introduction to hypertext mark-up language (html), creating web pages, lists, hyperlinks, tables, web forms, inserting images, frames.

**Unit-III: Cascading style sheet (CSS):** Concept of CSS, creating style sheet, Importing style sheets, CSS properties, CSS styling (background, text format, controlling fonts), CSS rules, Style Types, CSS Selectors, CSS cascade, working with block elements and objects, working with lists and tables, CSS id and class, box model (introduction, border properties, padding properties, margin properties).

**Unit-IV: Basics of JavaScript:** Document object model, data types and variables, functions, methods and events, controlling program flow, built-in objects and operators, validations.

### **Reference Books:**

- Nixon, R., Learning PHP, MySQL & JavaScript with jQuery, CSS and HTML5, O'Reilly, 2018.
- Powell, T.A. HTML & CSS: The Complete Reference, 5th edition, Tata McGrawHill, 2017.
- Duckett, J., JavaScript and JQuery: Interactive Front-End Web Development, Wiley, 2014.
- Boehm, A., & Ruvalcaba, Z., Murach's HTML5 and CCS, 4th edition, Mike Murach & Associates, 2018.
- Ivan Bayross, Web Enabled Commercial Application Development Using Html, Dhtml, Javascript, Perl CGI, BPB Publications, 2010

### **Practical:**

1. Create an HTML document with following formatting – Bold, Italics, Underline, Colors, Headings, Title, Font and Font Width, Background, Paragraph, Line Brakes, Horizontal Line, Blinking text as well as marquee text.
2. Create an HTML document with Ordered and Unordered lists, Inserting Images, Internal and External linking
3. Create an HTML document for displaying the current semester's timetable.
4. Create a website with horizontal and vertical frames. Top horizontal frame needs to show your college's name and logo. Bottom horizontal frame is to be split into two vertical frames. The left frame has hyperlinks to pages related to faculty, courses, student activities, etc. The right frame shows the corresponding webpage based on the link clicked on the left frame.
5. Create a student registration form using HTML which has the following controls and make an interactive content presentation using CSS:  

I. Text Box	II. Dropdown box	III. Option/radio buttons
IV. Check boxes	V. Reset and Submit button	
6. Create a webpage for your department with a drop-down navigation menu for faculty, courses, activities, etc.. Implement the webpage using styles, rules, selectors etc. learned in CSS • Write event-driven programs in JavaScript for the following:
  - Enter a number and on click of a button print its multiplication table.
  - Print the largest of three numbers entered by the user.
  - Find the factorial of a number entered by the user.
  - Enter a list of positive numbers using the prompt terminated by a zero. Find the sum and average of these numbers.
7. Create a student registration form using text, radio button, check box, drop down box, text field and all other required HTML elements. Customize the CSS and JavaScript to input and validate all data. Create functions to perform validation of each element, example:
  - Roll number is a 7-digit numeric value

# **BANKURA UNIVERSITY**

## **Curriculum and Credit Framework for BCA Programme**

**(Basic, Honours and Honours with Research)**

- Name should be an alphabetical value (String)
- Non-empty and valid fields like DOB
