Professor & Head
Department of Economics
Shivaji University
Kolhapur

CONCEPT NOTE

Sustainability adheres to the principle of balancing between “meeting present resource demand’ and ‘preserving future needs’. Educational stewardship is universally acknowledged as crucial for proper knowledge- acquisition, understanding, and application- for the attainment of Sustainable development. The present global context of digital transformation has unprecedentedly magnified the challenges of sustainability and thereby amplified the need for holistic, value- based and technology based education.

The aim of this Two- Day International Seminar on “Sustainability and Education in the Digital Era” is to provide a theoretical educational contribution to myriad challenges of sustainable development in the digital era. Furthermore in today’s digitalised world concerns related to equity, digital divide, ethical use of technology, data privacy, and environmental costs of digital infrastructure is looming large with its advantageous sides of online learning, digital platforms, artificial intelligence, open educational resources and virtual collaboration.

CALL FOR PAPERS

The International Seminar intends to address but not limited to the following sub-themes:

- Education for Sustainable Development (ESD): Concepts and Practices
- Digital Transformation in Education: Opportunities and Challenges
